1. Qualitative Information on First Half Financial Performance

(1) Results of Operations

In the first half of the current fiscal year, there were concerns about the economic downturn in China and other emerging Asian countries along with political changes in numerous countries. Although the outlook is uncertain, the Japanese economy slowly recovered as jobs and personal income grew and consumer spending remained firm due to the benefits of government economic measures.

In Japan's housing industry, consistently low interest rates for housing loans and government measures to encourage people to buy homes are creating a favorable business climate. As a result, the number of housing starts is climbing and there are other signs that the recovery in the housing sector is continuing.

The TamaHome Group is taking many actions based on the Tama Step 2018 medium-term plan that started in the previous fiscal year. The central objective of this plan is to grow by transitioning from model house network expansion to the expansion of our businesses, products and customer segments a geographic expansion to a customer segment expansion. Our goal is to build a new foundation for growth by supplying many types of products and services in order to serve a broader range of customer segments.

In the previous fiscal year, reportable segments included the Restaurant segment and Energy segment from the standpoint of reflecting the volume of business activities. Beginning with the first quarter of this fiscal year, the only reportable segment included from the standpoint of business volume is the Energy segment. Prior-year comparisons in the following sections are based on current year segments that have been restated in accordance with this revision.

Housing

Two sales offices were opened in association with office relocations and there were model house and showroom renovations at 36 locations. More emphasis was placed on supplying homes that closely incorporate regional characteristics. The order backlog at the end of the first half was higher than one year earlier because of a large volume of new orders. The basic line of homes in the low price range and homes offered for only a limited time were mainly responsible for the growth in orders. The number of home sales that were completed during the first half was also higher than one year ago.

The Dai-Anshin-no-le line of homes is the core component of our lineup of houses. During the first half, we added a new model to our Kireina-le line of homes by introducing a net zero energy house. In November 2016, the number of completed home sales since we started operations exceeded 100,000. We plan to use marketing campaigns and other activities to attract more people to our model houses and showrooms in order to continue increasing orders received.

Our home remodeling business has also performed well. We are conducting extensive sales activities to capture remodeling orders for home warranty extension work and other projects. Sales activities target mainly people who have lived in a TamaHome house or condominium for at least 10 years.

First half sales in this segment increased 9.7% from one year ago to 54,020 million yen and there was an operating loss of 1,522 million yen compared with a 2,996 million yen loss one year ago.

Real Estate

Tama Smart Town Ibaraki is a major housing development in this business segment. All homes in the second stage of this development have been sold as planned, resulting in the sale of 330 of the total of 583 homes to be sold at this community. In addition, about 5 to 10 other home sites were sold. Overall, first half orders received and completed sales for detached housing in this segment were higher than one year ago.

In the condominium sector, sales of all 22 units in the Anshia Ichikawa The Residence building were completed in July 2016. Three condominium projects are currently under way and all are performing as planned. The profit margin in the condominium business decreased mainly due to adjustments of selling prices.

First half sales in this segment increased 4.8% to 6,149 million yen and operating income was down 49.3% to 139 million yen.

Finance

Sales were down in this segment mainly due to a drop in the average insurance policy premium resulting from the termination of sales of property insurance policies with coverage of more than 10 years. To offset this decline, we worked on increasing the percentage of homes we sold that are covered by fire insurance we sell and on increasing commission rates. Furthermore, we placed emphasis on selling Flat 35 fixed-rate mortgages, which generate commission income. Another initiative in this segment is the use of financial planners to strengthen life insurance sales activities.

First half sales in this segment were down 31.0% to 448 million yen and operating income fell 62.3% to 133 million yen.

Energy

The mega-solar project in the city of Omuta in Fukuoka prefecture performed well because of consistently favorable weather. As a result, segment sales increased 1.9% to 460 million yen and operating income increased 6.4% to 195 million yen.

Others

Sales of business activities associated with houses increased along with growth in the number of home sales completed in the Housing segment. The operating loss decreased as TamaHome Group companies made progress with holding down selling, general and administrative expenses. As a result, segment sales increased 22.3% to 2,415 million yen and the operating loss decreased from 430 million yen one year ago to 306 million yen.

First half consolidated sales increased 9.2% to 63,494 million yen. The operating loss decreased from 2,599 million yen one year ago to 1,346 million yen, the ordinary loss decreased from 2,814 million yen to 1,494 million yen, and loss attributable to owners of parent decreased from 2,365 million yen to 1,547 million yen.

(4) Segment Information

<Overview of major products and services of reportable segments>

The reportable segments are constituent units of the Group for which separate financial information is obtained and examined on a regular basis by the Board of Directors, the chief operation decision maker, to determine the allocation of management resources and evaluate the business performance.

The TamaHome Group develops and provides products and services that enrich the daily lives of our customers based on the core theme of housing construction.

In accordance with the medium-term management plan, the Group has categorized "Housing" and "Non-housing" as its business domains.

To achieve sustainable growth in corporate value in these business domains, the Group has been making decisions on the allocation of management resources and monitoring the operating results.

As a result, the Group consists of three reportable business segments: the Housing business, the Real estate business and the Financial business, which are consistent with the above business domains.

Major products and services of the housing business is the construction contractor for "custom-built homes", "multi-unit homes", and contractor for "home renovation and other work".

Major products and services of the real estate business is the development and sale of "residential lots and detached homes" and "condominiums", "Subleasing of office buildings", and "real estate investment".

Major products and services of the financial business is "the Insurance agency services for fire, life, earthquake, as well as additional policies and agency services", and "the bridge loans for customers purchasing custombuilt homes".

Major products and services of "the energy business" is the administration of mega solar generation facilities, management.

The main products and services for each "reportable segment" described above are as follows:

Reportable Segment	Major Products and Services
Housing	 Construction contractor for custom-built homes Construction contractor for multi-unit homes Contractor for home renovation and other work Referrals for ancillary services and construction such as landscaping work
Real estate	Sale of residential lots and detached homes Planning, development and sale ofcondominiums Subleasing of office buildings
Financial	 Insurance agency services for fire, earthquake, as well as additional policies and agency services Bridge loans for customers purchasing custombuilt homes
Energy	●Administration of mega solar generation facilities, management
